Strategies and techniques to help you calm down and resolve your anger will also be included. Packets will be available at all medical facilities and upon request to Carol Roth, BOC-005, 867-2026. (JJ-C)

YEAR 2000 COMPUTING PROBLEM: For many computer and software systems, the year 2000 will bring problems related to software programs that record the year using only the last two digits. At the stroke of midnight on December 31, 1999, there is a very real chance many of the world's computers will assume the year just starting is 1900. Application software such as spreadsheets and databases which run on individual PCs should be checked to ensure they will process date information correctly. For information, call 861-2000. (FF-S2-A)

FORMS CONTROL: Before you begin creation of a new or existing form, either a KSC form or other Agency form, consult the KSC Forms Control Office. According to KMI 1420.1D, "Forms designed and used at KSC, including those by contractors, in the conduct of Government business will be centrally controlled and maintained by the KSC Forms Management Office to promote consistent quality, economy, and efficiency" as well as reducing redundancy. Forms Control presently handles over 3100 forms used at this Center. Many have been computer generated using various software common to KSC. Some forms may be similar to what you need, even if you think your application is unique. Forms Control personnel are proficient in applying your data collection information into the proper format to meet the required specifications. Contact your Forms Administrator or contact Forms Control at 867-3590, HQ, Room 1537 (across from the Post Office). (FF-S2-A)
